Summary

A motivated and enthusiastic Software Engineer seeking an opportunity to utilize my technical skills and knowledge in software development and debugging. With excellent problem-solving and troubleshooting abilities, I am confident in my capacity to make a substantial contribution to the success of the company. My ultimate goal is to help the team achieve their goals by creating quality and reliable software solutions.

Experience

PRRWEI Microfinance   September 2023 - Present
Database Adminstrator

Troubleshot MySQL and Oracle databases to identify errors and ensure system accuracy, improving overall performance.

Collecting user requirements and designed tailored strategies to meet demands, resulting in a cost reduction.

Designed and developed a database backup and recovery process that reduced downtime by 75%, ensuring business continuity and minimizing data loss.

Developed and implemented a database security strategy that improved data protection and compliance.

Techlava Software Limited   Oct 2020 - Aug 2023
Front End Web Developer

Creating functional, user-friendly websites and web application.

Writing code, develop and test new applications, monitor site performance and traffic.

Integrated Solutions   June 2018 - June 2019
Junior Software Developer

Developed and tested small applications to improve user experience, achieving a growth in customer satisfaction.

Refactored existing code to increase efficiency and maintainability, resulting in an average of 10% increase in development speed

Innovatech Solutions   March 2015 - March 2018
Software Developer Intern

Investigating application and security issues and implemented solutions, eliminating technical flaws and potential threats.

Researched, identified and integrated new technologies to optimize development processes.

Collaborated with cross-functional teams to create technical documentation, user manuals, and guidelines

Education

University of East London   June 2012 - March 2015
Software Engineering   BSc

Projects

E-Commerce Website   March 2024

It allows users to buy and place orders of a product. It has features for project detail page for digital products.

Checking out products.

Integrate with a payment gateway using react paystack.

Portfolio Website   Dec 2023

The portfolio website showcases and highlights my work, achievements, skills and experiences

To-Do Web App   Jan 2022

This project is about creating a web application with which you can keep track of your daily or weekly tasks. This essential and beginner-friendly app can help streamline your tasks in the long run

Customer Relationship Management System   June 2021

Managers will frequently use the Customer Relationship Manager web application to store, retrieve and alter customer data. This project involves building a backend web application that allows for customer data creation, reading, updating, and deletion

Student Result Management System   Dec 2019

The project's primary goal is to give the student's exam results quickly and understandably. Students and universities can benefit from this project by receiving results in an easy-to-understand manner. The student is the system's intended user, and students are given the ability to read and execute their results by entering login details. For brand-new students, registration is also an option
